We are so excited about the impact of sharing a consciousness of a principled and values-based living, focused on beliefs in unity, prosperity and wellness are accessible to all people. We witness in students, teachers and parents a new found appreciation for personal inspiration, responsibility, choice and service that connects us through the great human family. We are inviting everyone into the universe of possibility. If you are aligned, we invite you to join us as we develop the tools and resources to expand good. We learn and share the great benefit of Putting PEACE 1st.
